

PSG Expands Its Fence & Gate Division to the West Coast with the Acquisition of Econo Fence

January 15, 2026

Perimeter Solutions Group, LLC ("PSG") has officially acquired Econo Fence, based in Riverside, California.

Established in 1977, Econo Fence is one of Southern California's leading commercial fence contractors, serving municipal and commercial projects such as schools, sports complexes, and other public and private facilities for nearly 50 years.

The partnership with Econo Fence provides PSG with a strategic entry into one of the largest construction markets in the country and access to large-scale public works projects throughout the state of California. Notable projects include SoFi Stadium, as well as multiple facilities supporting upcoming World Cup and Olympic events in Los Angeles.

Econo Fence's capabilities strongly complement PSG's Fence & Gate division while further strengthening PSG's base of long-standing commercial fencing customers. In addition to permanent fence installation and gate fabrication, Econo Fence provides installation services for railings, enclosures, rails, barriers, playgrounds, and related systems.

Effective immediately, Frank Martinez will lead Econo Fence as President while also serving as Vice President of Perimeter Solutions Group. Previous owners Amanda and Jason Johnson will remain involved during an extended transition period to support existing customers and ongoing projects.

About Perimeter Solutions Group

Today, Perimeter Solutions Group operates from twelve physical locations, including Tampa and Lake Helen, Florida; Atlanta and Savannah, Georgia; Dallas, Texas; two locations in Phoenix, Arizona; Breckenridge, Colorado; three locations in Alabama; and now Riverside, California.
